Experience

London
Dec 2014 → Present

Senior Front-End Developer

I have worked within the UX/UI team to develop corporate websites and user interfaces for IRIS cloud applications. I created new features, maintained and refactored codebases and optimised pageload performances. I ensured the use of the latest front-end techniques and advocated for user experience best practices. I participated in the hiring and mentoring processes of junior developers.

London
Oct 2012 → Dec 2014

Full-Stack Web Developer

I developed and maintained websites for clients such as The Financial Times, The French National Healthcare, Energy Saving Trust, etc. I defined project technical specifications, ensured cross-browser/device compatibility and handled client communication.

Vancouver
Mar 2011 → Sep 2012

Full-Stack Web Developer

I worked on the development of connectthedoc.com, a booking platform for medical appointments in Canada. I developed Drupal and WordPress websites and trained website administrators. I received training in UX Design (delivered by Habanero Consulting Group) and Account Management.

Paris
Apr 2009 → Jan 2011

Front-End Web Developer

I converted designs from PSD to XHTML/CSS/Javascript and developed eZ Publish websites for clients such as Publicis Consultants, The French Ministry of Food and Agriculture, Louis Berger Group, etc.
