My name is **Vincent Navetat**. I recently became a UX Designer after 6 years of experience in Web development.

I work through the full UX lifecycle from research to design and testing utilising all elements of a user centred design process to create innovative cross-platform experiences.

Experience

.IRIS
London
Dec 2014 → Present

Senior Front-End Developer

I worked within the UX/UI team to developped corporate websites and user interfaces for IRIS cloud applications. I created new features, maintained and refactored codebases and improved webpages' performances.
I ensured the use of the latest front-end techniques and advocated for user experience best practices.
I participated in the hiring and mentoring processes of junior developers.

KALIOP INTERACTIVE MEDIA
London
Oct 2012 → Dec 2014

Full-Stack Web Developer

Developed and maintained websites for clients such as The Financial Times, The French National Healthcare, Energy Saving Trust. I defined project technical specifications, ensured cross-browser/device compatibility, handled client communication.

SMARTT
Vancouver
Mar 2011 → Sep 2012

Full-Stack Web Developer

Worked on the development of connectthedoc.com, the booking platform for medical appointments in Canada. I also developed Drupal and WordPress websites and trained website administrators. I received training in UX delivered by Habanero Consulting Group and Account Management.

maecia
Paris
Apr 2009 → Jan 2011

Front-End Web Developer

Developed and maintained eZ Publish websites, for clients such as Publicis Consultants, The French Ministry of Food, Louis Berger Group. I converted designs from PSD to XHTML/CSS/Javascript, handled client communication, wrote user documentation and trained website administrators.
